AMES Kompres Compacting and Lateral Mobile Systems

High-Value Storage System

If your organization is searching for a cost-effective way to put more files in less space, AMES Kompres Compacting and Lateral systems are the answer. The Kompres systems can double the amount of useful space in your storage area by putting filed materials on wheels. Less effort is required to open and close mobile units, making them ideal for heavy materials. Additionally, a mechanical-assist drive system is available for additional ease of movement.

Easily Installed

The Kompres systems can be installed directly on any carpeted or hard-floor surface. The modular design makes the system easy to expand and easy to relocate. Carriages are built and sized to order, to meet your full range of shelving requirements.

Sturdy and Long Lasting

Kompres Compacting and Lateral carriages are fully welded instead of bolted, providing durability and eliminating binding and racking. For easy maintenance and adjustment, built-in track leveling bolts allow the system to be leveled at any time, even after it is fully loaded. The track splice design keeps the rails in alignment and prevents rail separation.

Benefits

- ✓ Economical mobile storage - utilize existing shelving
- ✓ Relocate easily as your storage needs change
- ✓ Level the system without removing shelving and stored material
- ✓ Easily expandable and movable
- ✓ Optimize storage space in a small file area

STORAGE SYSTEMS

Safety Advantages

Anti-tip devices are standard on all AMES lateral units and optional for compacting units. The chain drive on a compacting mechanical system is enclosed for safety. Additionally, AMES' Kompress track is fully ADA compliant.

Enhance Your Office Environment

AMES Kompress Compacting and Lateral Mobile systems offer a complete spectrum of design possibilities including color and texture choices to create visual harmony in any environment. Optional end panels are available in painted steel, fabric or laminated with self-edged or radius treatments.

Specifications

- System Height – Kompress track and carriage adds 4" to overall shelving height
- Weight Load – Kompress carriages will bear up to 700 lbs. per linear foot

System Components

- Standard track assembly
- Anti-tip assembly (standard for lateral systems, optional for compacting systems)
- Movable carriages
- Rail stops and end caps

Shelving

Use your existing shelving or select from AMES' extensive line of shelving and cabinets.

About AMES

As the recognized leader in the records and information management industry, we develop custom solutions that enable our clients to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With years of experience, we serve clients in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government.
